No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1990 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

CONTENTS OF VOLUME 282

Number 1, October 1990

COMMUNICATIONS

- On the Nature of the Cytochrome P450_{scc} "Ultimate Oxidant": Characterization of a Productive Radical Intermediate *Christian Larroque, Reinhard Lange, Luc Maurin, Alain Bienvenue, and Johan E. van Lier* 198
- Base Modifications in Plasmid DNA Caused by Potassium Permanganate
Steven A. Akman, James H. Doroshov, and Miral Dizdaroglu 202

BIOLOGICAL OXIDATIONS, BIOENERGETICS, AND P450 REACTIONS

- Reactivity of Ebselen and Related Selenoorganic Compounds with 1,2-Dichloroethane Radical Cations and Halogenated Peroxyl Radicals
Christian Schöneich, Vasanthy Narayanaswami, Klaus-Dieter Asmus, and Helmut Sies 18
- Modulation of Benzoquinone-Induced Cytotoxicity by Diethyldithiocarbamate in Isolated Hepatocytes
Véronique V. Lauriault, Larry G. McGirr, Wilson W. C. Wong, and Peter J. O'Brien 26
- Blood Antioxidant Status and Erythrocyte Lipid Peroxidation following Distance Running
Garry G. Duthie, John D. Robertson, Ronald J. Maughan, and Philip C. Morrice 78
- Mutagenesis of the α Subunit of the F₁F₀-ATP Synthase from *Escherichia coli* in the Region of Asn-192
Steven B. Vik, Daisy Lee, Catherine E. Curtis, and Lan T. Nguyen 125
- Purification and Characterization of Cytochrome P450 Isozymes from β -Naphthoflavone-Induced Adult Hen Liver
Ram P. Gupta, Daniel M. Lapadula, and Mohamed B. Abou-Donia 170

ENZYME MECHANISMS AND METABOLIC REGULATION

- Rat Renal Proximal Tubular Gluconeogenesis: Possible Involvement of Nonmitochondrial Carbonic Anhydrase Isozymes
Susanna J. Dodgson and Kay Cherian 1
- Purification and Characterization of a Low-Molecular-Weight Acid Phosphatase—A Phosphotyrosyl-Protein Phosphatase from Bovine Heart
Zhong-Yin Zhang and Robert L. Van Etten 39
- The Purification and Properties of Aldose Reductase from Rat Ovary
Nobuhisa Iwata, Norihisa Inazu, and Tetsuo Satoh 70
- Inhibition of Phosphoenolpyruvate Carboxykinase from *Trypanosoma (Schizotrypanum) cruzi* Epimastigotes by 3-Mercaptopicolinic Acid: *in Vitro* and *in Vivo* Studies
Julio A. Urbina, Clara E. Osorno, and Anibal Rojas 91
- Isolation and Characterization of a Dimeric cAMP-Dependent Protein Kinase from the Fungus *Saccobolus platensis*
Susana Silberstein, Maria Leonor Cantore, Miguel Angel Galvagno, and Susana Passeron 132
- Purification of NADPH-Linked α,β -Ketoalkene Double Bond Reductase from Rat Liver
Shigeyuki Kitamura and Kiyoshi Tatsumi 183

GLYCOPROTEINS, GLYCOLIPIDS, AND EXTRACELLULAR MATRICES

- Transient Expression of Type 2 Chain in A-Active Hexaglycosylceramide of Rat Small Intestine at Weaning Time. Demonstration by Affinity Chromatography and Ceramide Glycanase Hydrolysis of A-Active Glycosphingolipids followed by Gas Chromatography and Mass Spectrometry of Permethylated Hexasaccharides
Danièle Bouhours, Jean-François Bouhours, Göran Larson, Hasse Karlsson, Weston Pimlott, and Gunnar C. Hansson 141
- Regional Differences in the Appearance of Adult-Type Glycosphingolipids in the Small Intestine of Inbred Rats at Weaning Time
Danièle Bouhours, Jean-François Bouhours, Göran Larson, and Gunnar C. Hansson 147

LIPIDS AND LIPID MEDIATORS

- Alkyl Free Radicals from the β -Scission of Fatty Acid Alkoxy Radicals as Detected by Spin Trapping in a Lipoxygenase System
Walee Chamulitrat and Ronald P. Mason 65

MEMBRANE RECEPTORS, TRANSPORT, AND INTRACELLULAR SIGNALS

- Purification and Partial Characterization of Ceruloplasmin Receptors from Rat Liver Endothelium
Eijiro Omoto and Mehdi Tavassoli 34
- β -Glucuronidase Is Transported Slowly to Lysosomes in BW5147 Mouse Lymphoma Cells: Evidence that the Prelysosomal Enzyme Is Not Restricted to the Endoplasmic Reticulum
Deborah Lazzarino and Christopher A. Gabel 100
- Characterization of the Interaction of Parathyroid Hormone with the Mitochondrial ATPase
Ronald Laethem and James E. Zull 161
- Regulation of Platelet-Activating Factor Receptor and PAF Receptor-Mediated Arachidonic Acid Release by Protein Kinase C Activation in Rat Kupffer Cells
Wei Chao, Heling Liu, Donald J. Hanahan, and Merle S. Olson 188

PLANT MOLECULAR BIOLOGY, BIOCHEMISTRY, AND PHOTOSYNTHESIS

- Flavanone-specific 7-O-Glucosyltransferase Activity in *Citrus paradisi* Seedlings: Purification and Characterization
Cecilia A. McIntosh, Lilian Latchinian, and Richard L. Mansell 50
- Purification and Characterization of the Sesquiterpene Cyclase Patchoulol Synthase from *Pogostemon cablin*
Sharon L. Munck and Rodney Croteau 58
- Purification and Characterization of Flavone Synthase I, a 2-Oxoglutarate-Dependent Desaturase
Lothar Britsch 152

PROTEIN STRUCTURE AND FUNCTION

- Isolation of Cytochrome P450 from Hepatopancreas Microsomes of the Spiny Lobster, *Panulirus argus*, and Determination of Catalytic Activity with NADPH Cytochrome P450 Reductase from Vertebrate Liver
Margaret O. James 8
- ^1H NMR Studies of *Chromatium vinosum* Cytochrome *c'*
Ivano Bertini, Fabrizio Briganti, Roberto Monnanni, Andrea Scozzafava, Pietro Carlozzi, and Riccardo Materassi 84
- Yeast Thioltransferase—The Active Site Cysteines Display Differential Reactivity
Zhong-Ru Gan, Mohinder K. Sardana, John W. Jacobs, and Mark A. Polokoff 110
- Structural and Functional Studies of the Rat Mitochondrial Single Strand DNA Binding Protein P16
Glenn D. Hoke, Pamela A. Pavco, Brian J. Ledwith, and Glenn C. Van Tuyle 116

Number 2, November 1, 1990

BIOLOGICAL OXIDATIONS, BIOENERGETICS, AND P450 REACTIONS

- Recycling and Antioxidant Activity of Tocopherol Homologs of Differing Hydrocarbon Chain Lengths in Liver Microsomes
Valerian E. Kagan, Elena A. Serbinova, and Lester Packer 221
- Variations in the Activity of Glutathione Reductase and the Cellular Glutathione Content in Relation to Sensitivity to Methylviologen in *Escherichia coli*
K. J. Kunert, C. F. Cresswell, A. Schmidt, P. M. Mullineaux, and C. H. Foyer 233
- Kinetics of Purple Membrane Dark-Adaptation in the Presence of Triton X-100
Juan M. González-Mañas, Félix M. Goñi, Marianne Tribout, and Sergio Paredes 239
- Increased Vitamin E Content in the Lung after Ozone Exposure: A Possible Mobilization in Response to Oxidative Stress
Nabil M. Elsayed, Mohammad G. Mustafa, and James F. Mead 263

- Microsomal Iron-Dependent NADPH Oxidation: Evidence for the Involvement of Membrane-Bound Non-heme Iron in NADPH Oxidation by Rat Heart Microsomes *Giorgio Minotti and Marco Di Gennaro* 270
- Influence of pH on Sulfhydryl Groups and Fluidity on the Mitochondrial Membrane *Guido Zimmer, Hans-Joachim Freisleben, and Jürgen Fuchs* 309
- Hydroperoxidase I Catalyzes Peroxidative Activation of 3,3'-Dichlorobenzidine to a Mutagen in *Salmonella typhimurium* *I. Jean McGowan-Jordan and P. David Josephy* 352
- Relationships between the Mitochondrial Transmembrane Potential, ATP Concentration, and Cytotoxicity in Isolated Rat Hepatocytes *Ellen Y. Wu, Martyn T. Smith, Giorgio Bellomo, and Donato Di Monte* 358
- pH Probes Respond to Redox Changes in Cytochrome *c* *Edward G. Sedgwick and Philip D. Bragg* 372
- Structural Studies on Bovine Spleen Heme Oxygenase. Immunological and Structural Diversity among Mammalian Heme Oxygenase Enzymes *Brent A. Schacter, Val Cripps, Robert F. Troxler, and Gwynneth D. Offner* 404
- Phospholipid Vesicles Containing Bovine Heart Mitochondrial Cytochrome *c* Oxidase and Subunit III-Deficient Enzyme: Analysis of Respiratory Control and Proton Translocating Activities *Kathryn S. Wilson and Lawrence J. Prochaska* 413

ENZYME MECHANISMS AND METABOLIC REGULATION

- Different Types of Formaldehyde-Oxidizing Dehydrogenases in *Nocardia* Species 239: Purification and Characterization of an NAD-Dependent Aldehyde Dehydrogenase *Peter W. Van Ophem and Johannis A. Duine* 248
- Effects of pH on Inactivation of Maize Phosphoenolpyruvate Carboxylase *Randolph T. Wedding and M. Kay Black* 284
- Binding Properties of Plasma Vitamin D-Binding Protein and Intestinal 1,25-Dihydroxyvitamin D₃ Receptor in Piglets with Pseudo-Vitamin D-Deficiency Rickets, Type I: Treatment Effects with Pharmacological Doses of Vitamin D₃ *R. Kaune, B. Schroeder, and J. Harmeyer* 326
- Studies on the Interaction of a Thiol-Dependent Hydrogen Peroxide Scavenging Enzyme and Phenylalanine Hydroxylase *Sheldon Milstien, Claude Dorche, and Seymour Kaufman* 346
- Alteration of Purine Metabolism by AICA-Riboside in Human B Lymphoblasts *Jerzy Barankiewicz, Roland Jimenez, Greg Ronlov, Madeleine Magill, and Harry E. Gruber* 377
- Hormonal and Acid-Base Regulation of Phosphoenolpyruvate Carboxykinase mRNA Levels in Rat Kidney *Malcolm Watford and Rhonda E. Mapes* 399

GENETIC STRUCTURE AND FUNCTION

- Pattern of Accumulation of Elastin and the Level of mRNA for Elastin in Aortic Tissue of Growing Chickens *F. W. Keeley, R. A. Hussain, and D. J. Johnson* 226
- Heme Oxygenase-2 mRNA: Developmental Expression in the Rat Liver and Response to Cobalt Chloride *Yi Sun and Mahin D. Maines* 340
- Role of Heme in Phenobarbital Induction of Cytochromes P450 and 5-Aminolevulinate Synthase in Cultured Rat Hepatocytes Maintained on an Extracellular Matrix *Peter R. Sinclair, Erin G. Schuetz, William J. Bement, Sally A. Haugen, Jacqueline F. Sinclair, Brian K. May, Donna Li, and Philip S. Guzelian* 386
- Substitution of Gly-96 to Ala in the 5-Enolpyruvylshikimate 3-Phosphate Synthase of *Klebsiella pneumoniae* Results in a Greatly Reduced Affinity for the Herbicide Glyphosate *Dietrich Sost and Nikolaus Amrhein* 433

LIPIDS AND LIPID MEDIATORS

- 15(S)-Hydroxyeicosatetraenoic Acid Is the Major Arachidonic Acid Metabolite in Human Bronchi: Association with Airway Epithelium *Maria Kumlin, Mats Hamberg, Elisabeth Granström, Thure Björck, Barbro Dahlén, Hisao Matsuda, Olle Zetterström, and Sven-Erik Dahlén* 254

- Presence of Individual Enzymes of Cholesterol Biosynthesis in Rat Liver Peroxisomes
Eeva-Liisa Appelkvist, Michael Reinhart, Robert Fischer, Jeffrey Billheimer, and Gustav Dallner 318
- Inhibition of Leukotriene ω -Oxidation by ω -Trifluoro Analogs of Leukotrienes
Gabriele Jedlitschky, Inka Leier, Michael Huber, Doris Mayer, and Dietrich Keppler 333

MEMBRANE RECEPTORS, TRANSPORT, AND INTRACELLULAR SIGNALS

- The Action of the Glutathione Transferase Substrate, 1-Chloro-2,4-Dinitrobenzene on Synaptosomal Glutathione Content and the Release of Hydrogen Peroxide
Franco Zoccarato, Lucia Cavallini, Renzo Deana, and Adolfo Alexandre 244
- Reactive Disulfide Compounds Induce Ca^{2+} Release from Cardiac Sarcoplasmic Reticulum
Sumanth D. Prabhu and Guy Salama 275

PHYSICAL BIOCHEMISTRY

- Reduction of Doxyl Stearates by Ascorbate in Unilamellar Liposomes
Marjeta Sentjurc, Goran Bacic, and Harold M. Swartz 207
- Thermodynamic Nonideality as a Probe of Reversible Protein Unfolding Effected by Variations in pH and Temperature: Studies of Ribonuclease
Keith E. Shearwin and Donald J. Winzor 297

PLANT MOLECULAR BIOLOGY, BIOCHEMISTRY, AND PHOTOSYNTHESIS

- Impaired Reductive Activation of Stromal Bisphosphatases in Tomato Leaves following Low-Temperature Exposure at High Light
Gretchen F. Sassenrath, Donald R. Ort, and Archie R. Portis, Jr. 302
- Activation of Sucrose-Phosphate Synthase from Darkened Spinach Leaves by an Endogenous Protein Phosphatase
Steven C. Huber and Joan L. Huber 421
- Aspartate Aminotransferase from *Eleusine coracana*, a C_4 Plant: Purification, Characterization, and Preparation of Antibody
Mitsutaka Taniguchi and Tatsuo Sugiyama 427
- Purification of Chorismate Synthase from a Cell Culture of the Higher Plant *Corydalis sempervirens* Pers.
Andreas Schaller, Volker Windhofer, and Nikolaus Amrhein 437

PROTEIN STRUCTURE AND FUNCTION

- The Effect of High pH upon Diphtheria Toxin Conformation and Model Membrane Association: Role of Partial Unfolding
Jan Kieleczawa, Jian-Min Zhao, Cindy L. Luongo, Long-Yu Dennis Dong, and Erwin London 214
- Three-Step Purification Method and Characterization of the Bovine Brain 90-kDa Heat Shock Protein
Hideaki Itoh, Itaru Toyoshima, Hideo Mizunuma, Ryoji Kobayashi, and Yohtalou Tashima 290
- Characterization of the 46,000-Dalton Subunit of eIF-4F
Stephen C. Conroy, Thomas E. Dever, Cheryl L. Owens, and William C. Merrick 363
- Chemical Modification of Chalcone Isomerase by Diethyl Pyrocarbonate: Histidine Residues Are Not Essential for Catalysis
Rodney A. Bednar and Adejare J. Adeniran 393
- AUTHOR INDEX FOR VOLUME 282 443

NOTICE

The Subject Index for Volume 282 will appear in the December 1990 issue as part of a cumulative index for the year 1990.

Archives of Biochemistry and Biophysics is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. **Short Communications** and **regular manuscripts** that contain new and significant information of general interest to workers in these fields are welcome. Sufficient detail must be included to enable others to repeat the work.

Short Communications offer a means of early publication of work of such importance that rapid publication is warranted. They should not exceed 15 double-spaced typed manuscript pages in length (including text, bibliography, tables, and figures). To expedite review and processing of communications, authors may send them directly to an Executive Editor most closely associated with the subject category of the communication. Communications sent to the Editorial Offices of the journal (see below) will be assigned to an Executive Editor.

Manuscripts should be written in clear, concise, and grammatical English and should be submitted in quadruplicate (one original and three photocopies), including four sets of original figures or good quality glossy prints, to:

Archives of Biochemistry and Biophysics

Editorial Office
Seventh Floor
1250 Sixth Avenue
San Diego, California 92101

Failure to receive the required number of copies of the manuscript may delay review. All copies of halftone artwork *must* be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process. *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

Gene sequences should be simultaneously submitted to a gene databank. Authors of papers describing new structure determinations are requested to submit to the Protein Data Bank all of the structural data required to validate the discussion, including both x-ray amplitudes and phases and the advised atomic coordinates.

Original papers only will be considered. ***Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all***

of the authors and by the institution where the work was carried out. It is the responsibility of the corresponding author to obtain the agreement of all the co-authors of the manuscript prior to its submission to the journal. Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in *Archives*, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in *Archives* represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. The corresponding author will receive a decision letter from the Executive Editor. Revised manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Form of manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of 8.5 × 11-in. white paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted:

Biological Oxidations, Bioenergetics, and P450 Reactions
Enzyme Mechanisms and Metabolic Regulation

¹ An extended Instructions to Authors is published in the January issue of *Archives of Biochemistry and Biophysics*. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC-IUB rules and recommendations, and accepted abbreviations.

Genetic Structure and Function
Glycoproteins, Glycolipids, and Extracellular Matrices
Lipids and Lipid Mediators
Membrane Receptors, Transport, and Intracellular Signals
Physical Biochemistry
Plant Molecular Biology, Biochemistry and Photosynthesis
Proteases, Protein Turnover, and Post-translational Processing
Protein Structure and Function

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in the Table of Contents, suggestions for index list entries, and the name and complete mailing address (and telephone number if possible) of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50–250 words.

Editorial style should conform to the *Handbook for Authors* (American Chemical Society).

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet; footnotes to tables should be identified by superscript lowercase italic letters (*^{a,b}*, etc.) and placed at the bottom of the table.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single-spaced whenever possible and preferably submitted as 5 × 7-in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. They should be planned to fit the proportion of the printed page ($7\frac{1}{8} \times 9$ in.; column width, 3.5 in.) and submitted no larger than 8.5 × 11 in. Lettering on drawings should be of professional quality or generated by

high-resolution computer graphics and should be large enough (10–12 points) to take a reduction of 50–60%. Drawings should be made with black India ink on tracing linen, smooth-surface white paper, or Bristol board. Alternatively, *high-quality* computer graphics may be acceptable. Graph paper, if used, should be ruled in blue. Glossy prints of figures properly prepared are acceptable. Illustrations in color can be accepted only if the authors defray the cost.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of *Chemical Abstracts Service Source Index*, 1985. Please note the following examples.

1. Webster, K. D., and Anders, M. W. (1989) *Arch. Biochem. Biophys.* **273**, 562–571.
2. Stein, W. D. (1986) *Transport and Diffusion across Cell Membranes*, Academic Press, San Diego.
3. Magnani, J. L., Spitalnik, S. L., and Ginsburg, V. (1987) in *Methods in Enzymology* (Ginsburg, V., Ed.), Vol. 138, pp. 195–207, Academic Press, San Diego.

Miniprint supplements are an effective way of presenting supportive data. They are printed from plates made by photographic reduction from typed pages provided by the author. Types of data that have been published as miniprint supplements include analyses relevant to studies of amino acid or polynucleotide sequences, details of chemical syntheses, preparation of enzymes, extended statistical or mathematical discussions, and X-ray diffraction data. The miniprint supplement is published in the journal, immediately following the parent paper, and is included in the reprints. Since the miniprint supplement is produced from camera-ready copy supplied by the authors with no redaction or editorial changes it is important that the copy be letter perfect and conform to the style of the journal. *Authors will not be permitted to make changes to the miniprint supplement at the proof stage. Any changes necessary in the proof must be made as a typeset "Note added in proof."*

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.
